DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8, new claims 9-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Renfroe (3563015).

Renfroe discloses and shows:

Fin extending upwardly from the blade (cl. 2, 10)

And downwardly from the blade (cl. 2, 10)

Art Unit: 3671

FIG. 3.

Substantially U-shaped raised, elongated portions on the blade (cl. 3, 10), open end opens towards the center of the blade, & the fin members extend laterally outward (cl. 4, 10)

Base of the fin flared outwardly (extending) & the slot is complimentary in shape (cl. 5, 6)

Extend at an angle
(new cl. 9, 10)

in re cl. 7 & 8, the range, choice of value for the fins extension from the blade, length of the fin members are as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. New claims 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Renfroe (3663015).

Renfroe discloses the claimed invention except for the spacing sizes between the blade & fin members, and fin member size. It would have been an obvious matter of design choice to have the size recited in the claims, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Response to Arguments

5. Applicant's arguments filed 10/19/2004 have been fully considered but they are not persuasive.

6. In applicant's argument that the prior art does not teach "a plurality of fin members ... blade rotates" and "fin member are inserted into the slots and extend" is not agreed with, the actual claim language is functional (i.e. insertable), therefore intended use of the device does not differentiate the claimed apparatus from the prior art apparatus satisfying the claimed structural limitations.

7. Applicant's argument that the claims require that the fin members extend upwardly and downwardly, is not agreed with, since the independent claim does not set forth this limitation; furthermore, applicant's attention is directed to fig 2 of the prior art, showing a sloped surface for the fin, therefore one end is upwardly situated and then other end downwardly from the upper section of the fin members.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Andersson et al.
